Business Case: Netflix - Data Exploration and Visualisation

© Objective

Analyzing the data and generate insights that could help Netflix in deciding which type of shows/movies to produce and how they can grow the business in different countries

About Data

1 df.head()

This tabular dataset consists of data as of mid-2021, about 8807 movies and tv shows available on Netflix, along with details such as - cast, directors, ratings, release year, duration, etc. The data is available in a single csv file

1. Importing Libraries , Loading the data and Basic Observations

```
1 #importing libraries

Insights

From the above analysis, it is clear that, data has total of 12 features with lots of mixed alpha numeric data. Also we can see missing data in 5 of the total columns.

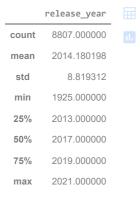

2. Exploratory Data Analysis

Statistical Summary

1 df.describe(include = 'object')

	show_id	type	title	director	cast	country	date_added	rating	d
count	8807	8807	8807	6173	7982	7976	8797	8803	
unique	8807	2	8807	4528	7692	748	1767	17	
top	s1	Movie	Dick Johnson	Rajiv Chilaka	David Attenborough	United States	January 1, 2020	TV-MA	1
4			13 17 201						•

1 df.describe()

Insights

- 1. Type of content Among the 8807 items available on Netflix, 6131 of them are movies, accounting for nearly 70% of the total content. The remaining 30% consists of TV series.
- 2. Director Rajiv Chilaka holds the top position on the director list, with 19 credits to his name. He specializes in creating animated movies
- 3. Cast David Attenborough leads the actor list with 19 appearances in various films and shows on Netflix.
- 4. Country The USA ranks at the top as the country with the highest production contribution to Netflix, accounting for 35% of the total
- 5. Date Added January 1, 2020, stands out as the peak date for content uploads on Netflix. On that day alone, approximately 109 different shows and movies were added to the platform.
- 2. Ratings There are 17 different types of ratings present on Netflix. The "TV-MA" (Mature Audience Only) rating dominates the charts, covering almost 36% of the total shows and movies on the platform with this rating.

```

Visualization of Dataset Nullity

```
# Correlation between missing Values
ax = msno.heatmap(df,figsize = (15,6),fontsize = 10)
ax.text(1.5,0,'Co-relation between missing Values',{'font':'serif', 'color':'black','weight':'bold','size':15})
plt.show()
```

Insights

- 1. From our above analysis, there are total of 6 columns containing missing values. Director's column has the most missing values followed by cast and country column. Date added, ratings and duration have significantly less missing values (<1%)
- 2. The heatmap illustrates the correlation of missing data between each pair of columns. Apart from strong correlation between rating and duration column, The fact that all other values are close to 0 indicates that there is no dependence between the occurrence of missing values in two variables

Replacing the missing values

```
1 df['director'].fillna('Unknown Director',inplace = True)
2 df['cast'].fillna('Unknown cast',inplace = True)
3 df['country'].fillna('Unknown country',inplace = True)
1 df.isnull().sum()
    show_id
    title
                    0
    director
    cast
    country
    date added
    release_year
                    0
    rating
                    0
    duration
                    0
    listed_in
                    0
    description
    dtype: int64
```

+ Adding new columns for better analysis

Add 3 columns - year_added,month_added,week_added to the df to facilitate further data analysis.

```
1 # converting date_added to datetime column
2 df['date_added'] = pd.to_datetime(df['date_added'])
3
4 #adding new columns
5 df['year_added'] = df['date_added'].dt.year
6 df['month_added'] = df['date_added'].dt.month_name()
7 df['week_added'] = df['date_added'].dt.isocalendar().week
8
9 df.head(3)
```

	show_id	type	title	director	cast	country	date_added	release_year
0	s1	Movie	Dick Johnson Is Dead	Kirsten Johnson	Unknown cast	United States	2021-09-25	2020
1	s2	TV Show	Blood & Water	Unknown Director	Ama Qamata, Khosi Ngema, Gail Mabalane, Thaban	South Africa	2021-09-24	2021
4								•

Un-nesting the columns for better analysis

We will create a new df which has un-nested director, cast and country columns into multiple rows which will help while doing analysis related to them.

```
1 # creating a separate table
2 df1 = copy.deepcopy(df)
5 df1["director"] = df["director"].str.split(", ")
6 df1["cast"] = df["cast"].str.split(", ")
7 df1["country"] = df["country"].str.split(", ")
9 df1 = df1.explode(['director'])
10 df1 = df1.explode(['cast'])
11 df1 = df1.explode(['country'])
12 df1.head(3)
        show_id type
                          title director
                                               cast country date_added release_year rat
                           Dick
                                                      United

- We see a slow start for Netflix over several years. Things begin to pick up in 2015 and then there is a rapid increase from 2016.
- · As we saw in the timeline at the start of this analysis, Netflix went global in 2016 and it is extremely noticeable in this plot.
- The rate of content additions decelerated in 2020, possibly attributed to the impact of the COVID-19 pandemic.

Insights

- 1. Content Investment Strategy
- Netflix heavily invests in content production in the USA, its home country, to attract and retain subscribers. India, being the second on the list, signifies Netflix's strategic focus on the Indian market due to its significant population and growing demand for streaming services.
- 2. Global Expansion

- The presence of shows from various countries, such as UK, Canada, France, Japan, etc. highlights Netflix's effort to cater to a diverse global audience. This also enables Netflix to provide content that resonates with the cultural and linguistic preferences of different regions.
- 3. TV Shows Vs Movies
- Indian's prefer to watch movies over TV shows, on contrary South koreans perfer Tv shows over movies.

🗸 器 🔽 💢 Content Split

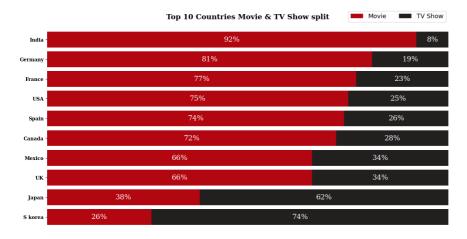

Content split for Top 10 Countries which have produced the most Movies and most TV Shows on Netflix.

- TV shows are more popular than movies in Asian countries, especially South Korea and Japan, where they account for more than 60% of the content.
- · Movies are more popular than TV shows in European countries, where they account for more than 65% of the content.
- India has the highest percentage of movies (92%) among all the countries, which may indicate a high demand for movies.
- North American countries have similar movie percentages (around 70%) and similar TV show percentages (around 30%) as each other, suggesting a similar preference or taste among these markets.

Best Month to launch a TV show/Movie?

Insights

- 1. Consistent Patterns The monthly upload count of both Movies and TV shows exhibits a remarkably similar trend.
- 2. Seasonal Fluctuations
- There is a notable correlation between content uploads and holiday seasons, with January and December witnessing significant spikes in content additions
- The months of July, August, October, and December record higher content upload counts, whereas February, May, and November experience comparatively lower counts.
- They may choose to focus on certain months or seasons to release high content and schedule fewer releases based on information about historical viewer preferences and behavior.

Total content distribution by release year of the content

```
1 plt.figure(figsize= (12,6))
2 sns.boxplot(data = df , x = 'release_year')
3 plt.xlabel('release_year' , fontsize = 12)
4 plt.title('Total_movies/TVshows_by_release_year')
5 plt.xticks(np.arange(1940 , 2021 , 5))
6 plt.xlim((1940 , 2022))
7 plt.show()
```

Insights

- Netflix have major content which is released in the year range 2000-2021
- It seems that the content older than year 2000 is almost missing from the Netflix.

- · Popular Movie genres on Netflix include International Movies, Comedies, Dramas, Action, and Romantic films.
- · Among TV Shows on Netflix, popular genres encompass Drama, Crime, Romance, Kids' content, Comedies, and International series.

🗸 🔍 Insights based on Non-Graphical and Visual Analysis

- Around 70% content on Netflix is Movies and around 30% content is TV shows.
- The movies and TV shows uploading on the Netflix started from the year 2008, It had very lesser content till 2014.
- Year 2015 marks the drastic surge in the content getting uploaded on Netflix. It continues the uptrend since then and 2019 marks the
 highest number of movies and TV shows added on the Netflix. Year 2020 and 2021 has seen the drop in content added on Netflix,
 possibly because of Pandemic. But still, TV shows content have not dropped as drastic as movies.
- Since 2018, A drop in the movies is seen, but rise in TV shows is observed clearly. Being in continuous uptrend, TV shows surpassed the movies count in mid 2020. It shows the rise in popularity of tv shows in recent years.
- · Netflix has movies from variety of directors. Around 4993 directors have their movies or tv shows on Netflix
- Netflix has movies from total 122 countries, United States being the highset contributor with almost 37% of all the content.
- The release year for shows is concentrated in the range 2005-2021.
- 50 mins 150 mins is the range of movie durations, excluding potential outliers.
- 1-3 seasons is the range for TV shows seasons, excluding potential outliers.
- various ratings of content is available on netfilx, for the various viewers categories like kids, adults, families. Highest number of movies and TV shows are rated TV-MA (for mature audiences).
- Content in most of the ratings is available in lesser quantity except in US. Ratings like TV-Y7, TV-Y7 FV, PG, TV-G, G, TV-Y, TV-PG are very less available in all countries except US
- International Movies and TV Shows, Dramas, and Comedies are the top 3 genres on Netflix for both Movies and TV shows.
- Mostly country specific popular genres are observed in each country. Only United States have a good mix of almost all genres. Eg. Korean TV shows (Korea), British TV Shows (UK), Anime features and Anime series (Japan) and so on.
- · Indian Actors have been acted in maximum movies on netflix. Top 5 actors are in India based on quantity of movies.
- Shorter duration movies have been popular in last 10 years.

Business Insights

- Netflix have majority of content which is released after the year 2000. It is observed that the content older than year 2000 is very scarce on Netflix. Senior Citizen could be the target audience for such content, which is almost missing currently.
- Maximum content (more than 80%) is
 - TV-MA Content intended for mature audiences aged 17 and above
- > TV-14 Content suitable for viewers aged 14 and above.
- > TV-PG Parental guidance suggested (similar ratings PG-13 , PG)
- > R Restricted Content, that may not be suitable for viewers under age 17.

These ratings' movies target Matured and Adult audience. Rest 20 % of the content is for kids aged below 13. It shows that Netflix is currently serving mostly Mature audiences or Children with parental guidance.

- These ratings' movies target Matured and Adult audience. Rest 20 % of the content is for kids aged below 13. It shows that Netflix is currently serving mostly Mature audiences or Children with parental guidance.
- Maximum content of Netflix which is around 75%, is coming from the top 10 countries. Rest of the world only contributes 25% of the content. More countries can be focussed in future to grow the business.
- Liking towards the shorter duration content is on the rise. (duration 75 to 150 minutes and seasons 1 to 3) This can be considered while
